Company Overview

Interior Electrics specialises in Electrical, Voice and Data Design and Installation Services – Refurbishment and Small Construction.

Formed in 1986, Interior Electrics has grown from a modest “one man operation” to an innovative and dynamic company and industry specialist. Our growth is founded on solid business principles.

Our objective is to maintain high standards in all facets of our business, a commitment to continually research, new products and innovative electrical solutions; and more importantly a commitment to foster strong Client relationships.

A reputation for expertise, integrity and reliability in Client relationships

Since the company's inception, Interior Electrics has maintained its focus on meeting our Clients' requirements.

As a result, we've gained a reputation as the Electrical/Data Specialist of choice for many Architects, Design and Consultancy firms, catering for the full range of client considerations - from economic feasibility, time and ease of installation, to portability, effectiveness and practicality.

Interior Electrics has earned its solid reputation by providing our Clients:

- **Expertise** – our early involvement and professional input in a project's design ensures cost effective solutions
- **Integrity and reliability** – we have a proven track record for delivering projects on time and on budget
- **Flexibility** – we understand that as a project evolves, our Client may sometimes require changes to be made to the initial scope of work; we always work in partnership with our Clients to meet their requirements
- **Latest technology** – we recognise the importance of planning for the future, and continuously monitor industry developments and technological changes to offer our Clients the best that modern technology can offer

The success of Interior Electrics reflects on our continual monitoring of the needs of our Clients and our consistent delivery of service and on-time, quality installations.

Project Management

Our Approach

Interior Electrics treats each job with the same focus and commitment – regardless of its size.

When quoting a project, we take great care to ensure the supplied drawings are interpreted correctly. We look further than the immediate requirement to ensure that the infrastructures you implement now will support the applications you may need tomorrow. If necessary, we'll make suggestions to improve the design, with focus placed on the Electrical Voice and Data aspect of the project.

Resources are analysed to determine the most efficient approach, bearing in mind the state of work in progress.

Execution of Projects

On acceptance of our quotation, an experienced Project Manager is assigned to the project. It is their responsibility to ensure:

- Personnel and equipment are available and on site when required.
- Correct revision “for construction” drawings are available on site.
- Scheduled time frames incorporate all other trades.
- Services set out are confirmed correct prior to installation.
- Fittings and fixtures are available and have been delivered.
- Contingency plans are implemented if any unforeseen delays occur.
- All documentation is available upon completion of the project.

“ By having the
PROJECT MANAGER
& on the team, **QUALITY CONTROL,**
CUSTOMER SATISFACTION
are assured. ”

- Xpedite / Optus

What our Clients say about us ...

Business Objects has been a customer of Interior Electrics for the past couple of years. Interior Electrics played an integral part during the fitout stages of our new tenancy in North Sydney. We have since maintained an ongoing relationship with Interior Electrics and find them to be very responsive, reliable and professional in their work.

~ Margaret Owen, Executive Assistant

As **The Patterson Group** is a service driven organisation and our clients often work to strict budget requirements and timelines, we rely very heavily on our contractors. We have used the services of Interior Electrics since we started in this industry and have complete faith in their ability to work to our timelines and to fixed prices. We employ Interior Electrics for all matters relating to electrical works including structured cabling systems, exit and emergency lighting, lighting and power infrastructure works. I have found them to be well informed and experienced in all matters relating to our industry and have no hesitation in recommending them.

~ Ashley Patterson, Director
